SUMMARY

I am **Muqeet Ahmed** a experienced and certified **Full Stack Software Developer** with **1.8+ years of professional corporate experience** building modern web and mobile applications using **MERN**, **MEAN** and **NATIVE,** technology stacks (**Node.js**, **Express.js**, **React.js**, **Angular**, **Vue.js**, **Nuxt.js**, **React Native, Capacitors**). Successfully delivered **50+ production websites** and **mobile applications** with focus on **fast performance**, **easy scaling**, and **great user experience**. Expert in **frontend development** using **React.js**, **Angular**, **Vue.js**, **TypeScript**, and **state management** with **Redux Toolkit**, **Pinia**, **Zustand**, and **NgRx**. Strong **backend development** skills in **Node.js**, **Express.js**, **RESTful APIs**. Proficient in **all major databases** including **MongoDB**, **PostgreSQL**, **MySQL**, **MariaDB**, **DynamoDB** with **ORM/ODM tools** like **Sequelize**, **Mongoose**, **Prisma**, and **Drizzle**. Specializes in **mobile app development** using **React Native**, **Ionic Framework**, and **Capacitor** to build **cross-platform apps** that work on both web and mobile. Experienced with **cloud platforms** including **AWS**, **Firebase**, **Supabase**, **Vercel** and **CI/CD pipelines** for **automatic deployment** and **Progressive Web Apps**. Uses **Google Analytics** and **custom tracking** to measure **app performance** and **user behavior** for **business growth**. Committed to building **high-quality applications** that help businesses grow and provide excellent user experiences across all platforms.

KEY ACHIEVEMENTS

💎 **Website and Application Development Success**

Developed and launched 50+ websites and applications with MERN and Native stacks, focusing on performance and scalability.

💎 **Real time Web Sockets Application Excellence**

Led development of real-time chat application, achieving seamless communication with WebRTC and WebSockets.

💎 **Secure Payment and Maps Integration Achievement**

Built secure payment integration systems using Stripe, MasterPay with webhook architecture for real-time processing.

💎 **Management Systems Platform Improvement**

Enhanced logistics / Staff management platform with role-based access control, improving efficiency and scalability significantly.

EXPERIENCE

10/2024 - Present

Karachi, Pakistan

MERN MEAN NUXT.JS & REACT NATIVE DEVELOPER
TURINGOID

🔗 www.turingoid.com

Turingoid is a **product-based company** and specializing in providing **web and app solutions** for only the long term clients. With a focus on innovation and scalability

- Developed **Excel AI Full Stack Application** https://app.babyzilla.ai that connects with **OpenAI and Grok3** using **3rd party API and STREAM API** to create **smart formula, suggestions** and **data visualization** for **Excel file processing**. Built complete system with **user authentication**, **MySQL database** with **Sequelize ORM**, and **payment integration** using **Stripe**. Designed **user-friendly interface** that looks like **GPT Excel** for easy file upload and management. Created **secure backend** using **Node.js** and **CORS** for **safe data handling** and **smooth user experience**. Application handles both **small and large Excel files** with **AI-powered features** for **business analytics** and **reporting**.
- One of my key long-term projects at **Turingoid** is **VipMe**, a **cross-platform mobile application** built with **React Native** for **Android** and **iOS** with accompanying **web platform**. Developed complete **Event and restaurant booking system** where **users**, **businesses**, and **vendors** can connect and **book tables**. Built advanced **social features** including **reels**, **stories**, **user mentions**, and **real-time messaging** with **live video** and **audio calling** using **WebRTC** and **WebSocket technology**. Created **business dashboard** for **ad management** and **profile creation**, plus **user safety features** like **blocking system**. Engineered **scalable backend** using **Node.js** deployed on **AWS EC2 instances** with **DynamoDB** for **high-performance data storage** and **media management**. Implemented **secure file handling** and **real-time communication** for **seamless user experience** across **mobile** and **web platforms**.

05/2024 - 10/2024

Karachi, Pakistan

MERN STACK DEVELOPER
Digital Elliptical

🔗 www.digitalelliptical.com

Digital Elliptical is a software service company specializing in scalable **software solutions** services. They excel in enhancing existing systems or building new ones, delivering high-quality, professional results for large, **complex management systems.**

- Contributed to **AFZ Delivery Services** (https://afzdeliveryservices.com) logistics platform at **Digital Elliptical** (UAE-based) with **multi-role architecture** supporting **Admin/Manager/Business/User/Rider** access levels using **React.js**, **Redux**, **Node.js**, **MongoDB/Mongoose**, and **Firebase notifications**. Developed **container management**, **ride assignment**, **ratings/reviews**, and **role-based access control**. Also built **Kuwait-based salon platform** with **on-demand home services**, **vendor management**, **rider assignment**, **payment processing**, **rating system**, and **Google Maps integration** for **scalable cross-platform deployment**. Implemented **real-time tracking**, **automated notifications**, **secure API integrations**, and **responsive web design** to ensure **optimal user experience** and **business growth** across **Middle East markets**.

EXPERIENCE

12/2023 - 05/2024

Hyderabad, Pakistan

Junior Web Developer
Lofty Soft
🔗 lofty-soft.com

.LOFTY Soft is a project-based Software company specializing in Laravel PHP and front-end development projects.

- Specialized in **full-stack integration** between **ReactJS NextJS frontend** and **Laravel/REST APIs**, developing **seamless backend-to-frontend communication** systems that optimize **data flow**, improve **application performance**, and deliver **responsive user interfaces** for **modern web applications** with **enhanced user experience** and **scalable architecture**.
- Focused on **advanced front-end development** utilizing **ReactJS**, **Redux toolkit**, **Context API**, and **Tailwind CSS** to create **dynamic user interfaces** with **reusable components**, **efficient state management**, and **modern CSS frameworks** delivering **pixel-perfect designs**, **fast loading times**, and **accessible web applications** across **multiple devices** and **browsers**.
- Collaborated with **cross-functional teams** including **product managers**, **designers**, and **backend developers** to architect and implement **scalable state management solutions** using **Redux**, **Context API**, and **modern JavaScript patterns**, ensuring **optimal application performance**, **maintainable codebase**, and **seamless team collaboration** for **efficient project delivery** and **long-term system scalability**.

EDUCATION

01/2022 - 01/2025

Jamshoro, Pakistan

Bachelor's in Management Information Systems (MIS), specializing in Information Technology Administration and Management.
University of Sindh

CGPA **4.0** / **3.2**

- Comprehensive coursework in **database management**, **systems analysis**, and **business process optimization.** Expertise in **technology integration**, **business intelligence**, **system security**, and **cross-functional team leadership** for **digital transformation**

11/2022

Jamshoro, Pakistan

Web-Development, Information Technology
The GETS

GPA **4.0** / **3.5**

- Emphasized both technical and **software solutions**, **database design and architecture**, **system modeling**, **data flow diagrams**, and **entity-relationship modeling** with expertise in **relational database management systems** and **SQL optimization**. **Database system architecture design**, **planning**, **server administration**, **cloud infrastructure management and requirements analysis**, **system integration**, **API design**,

PERSONAL PROJECTS

Real-Time WhatsApp-Like Chat Application (MERN Stack + WebSocket's & WebRTC)
📅 11/2024 - Present   📍 Karachi, Pakistan

Built **real-time messaging application** using **React.js**, **Node.js**, **Express.js**, **MongoDB** with **WebSocket (Socket.io)** and **WebRTC** for **instant communication** and **voice/video calling**. Features **user authentication**, **live status**, and **interactive messaging** similar to **WhatsApp** functionality.

- **Instant Messaging & Calls**: Supports real-time text messaging, voice, and video calls with WebSocket's for low-latency communication.
- **Live Status & Indicators:** Shows online/offline status (green dot), typing notifications, recording indicators, ensuring a dynamic chat experience.

Full Stack E-Commerce Site (MERN Stack)
📅 02/2024 - 07/2024   📍 Jamshoro, Pakistan

Built **full-stack E-Commerce platform** using **React.js**, **Node.js**, **Express.js**, **PostgreSQL** with **multi-role authentication** (SuperAdmin/Vendor/User), **cart**, **secure payment integration** via **JazzCash/EasyPaisa/MasterPay**, and **comprehensive dashboards** for **order tracking** and **inventory MGT.**

- Role-Based Access Control (Super Admin, Vendor, User) with Secure Authentication
- Real-Time Cart, Order Tracking, Email Notifications, and Location-Based Billing Dynamic Blog with Nested Comments & Vendor/Admin Dashboards
- Multi-Payment Gateway Support: Jazz Cash, EasyPaisa, Master Pay, Redux for Efficient State Management & Performance Optimization

SKILLS

| BACK-END | Node.js | Express.js | WebSocket's | Stream Apis | 3rd Party Apis | MVCS | MVC |

| DATA-BASES | Mongo-DB | MySQL | PostgreSQL | Maria-DB | Firebase | Supabase | Dynamo-DB |

| FRONT-END | React.js | Next.js | Nuxt.js | Vue.js | Angular | React-Native | Capacitors | Redux | Tailwind CSS |
